

Your Essential Fine Wine Partner

Liv-ex offers something truly unique; from fine wine market insights, to buying and selling opportunities, to end-to-end logistics services. We support our members throughout decision making and supply chain.

Understand the Market

- Whether pricing, buying or selling fine wine – understand the broad market, as well as the granular market you operate in
- We have a team of internal market experts who continuously monitor the market and share insight and analysis in real time – helping members spot trends early and respond as they emerge.

Price Wine

- Understand the trends and evolutions of fine wine value with 25 years of historic data
- Access unique transactional data – the genuine price a wine has sold for on the exchange, not advertised or aspirational listed prices
 - See real-time offers of wine and bids against the wine to understand current demand and appetite
- Reduce the time it takes to price wine - let us do the heavy lifting. In 2025 we collected, analysed and standardise 45 million lines of list data, creating a single source of truth for fine wine pricing

Buy or Sell

- Liv-ex connects you with over 500 vetted wine businesses around the world
 - Expand your network without the risk or admin – we are your only point of contact in every deal
 - Access £110+ million of live offers
- SIB contracts tell you the condition of the wine before you buy – giving you confidence in what you're purchasing
- Offers and bids are firm commitments to buy and sell, eliminating time-consuming back-and-forth

Transport Wine

- Liv-ex moves wine from seller to buyer, handling all paperwork and logistics administration on your behalf
- We authenticate and store the wine in our state-of-the-art warehouses, reducing the risk associated with secondary market trading
- We pay the seller as soon as the wine is authenticated

In short, we bring together the data, insights, network and infrastructure you need to price and trade fine wine with confidence – helping you make better decisions, reduce risk, and operate more efficiently at every stage.
